# Ways to save energy

Write down your ways to save energy and its reason.

No.	Ways	Reasons
1.	Switching off lights or other electrical appliances when we are not using them	To reduce energy consumption
2.	Replace all the light bulbs	Traditional incandescent light bulbs consume an excessive amount of electricity
3.	Wash only full loads of dishes and clothes.	To reduce energy consumption
4.	Unplug all the electrical appliances when we are not using them	There will be energy vampire that continue to consume energy in the plug even we switched them off
5.	Purchase energy-efficient electrical appliances	To reduce energy consumption
6.	Set your computer to sleep or hibernate mode instead of using a screen saver	To use less electricity during periods of inactivity
